

INSECTS & BUGS HUNT

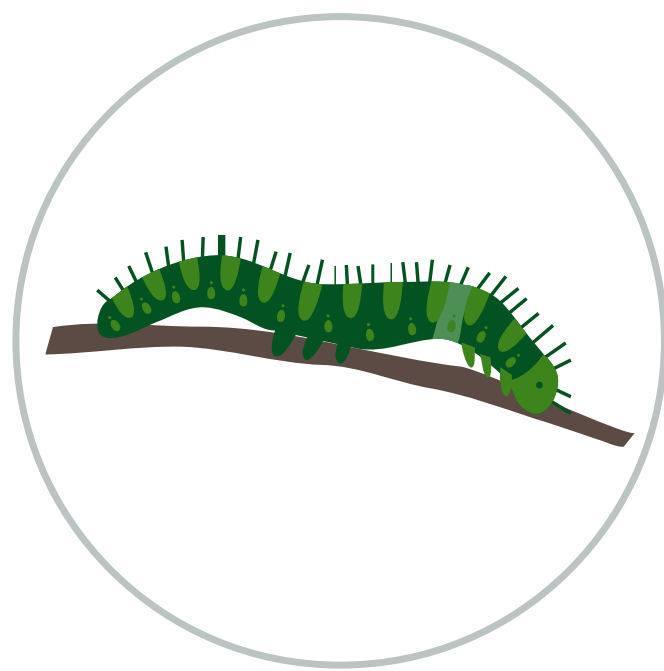

Grab your magnifying glass, an empty jar with a lid, a pen, and some paper, and head out on an adventure. When you find an insect, you can check it off your list. Some insects can be observed up close by briefly placing them in a jar. Make sure to put some grass or leaves in the jar first, and release the insects back into nature immediately afterward.

grasshopper

ant

caterpillar

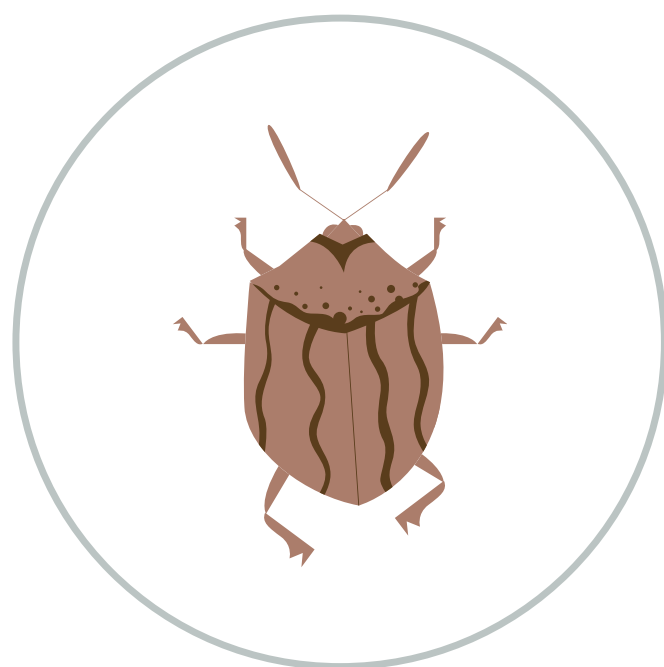

bee

beetle

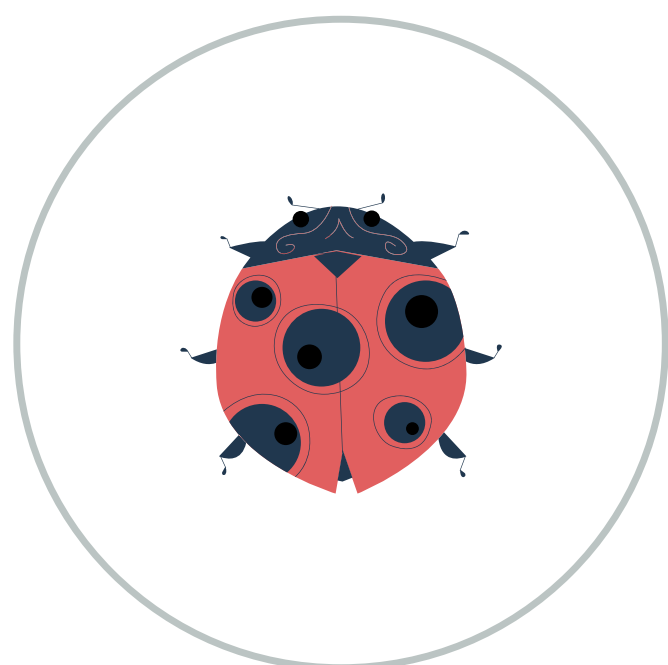

butterfly

stink bug

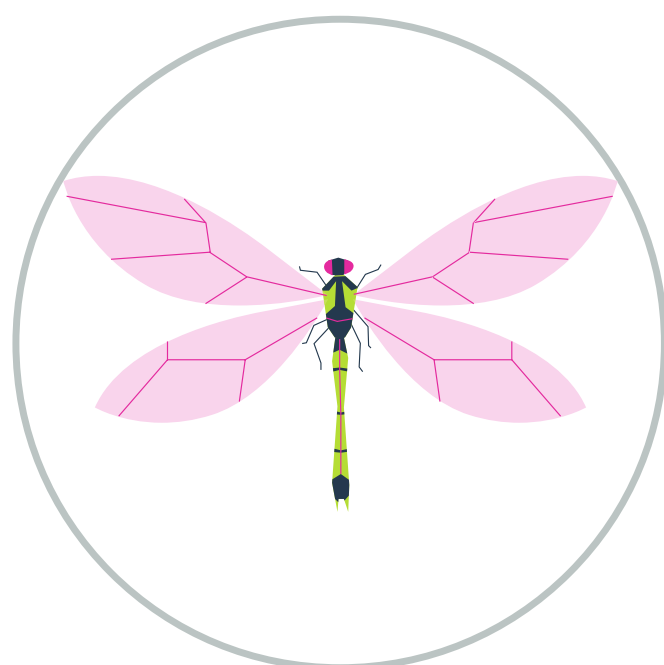

**praying
mantis**

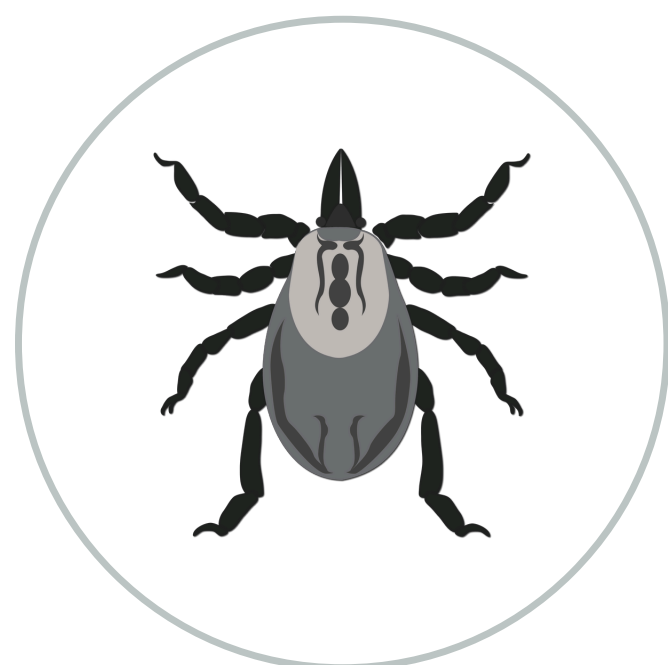

ladybug

cockroach

dragonfly

tick
